Message from the MD

India continues to represent a large and attractive long-term growth opportunity with strong GDP growth, a growing middle class and young population structure. In 2015, India had one of the fastest GDP growth rates for a large economy.

However, 2015 has been very challenging with the farm sector being impacted for the second year in a row with deficit monsoons and inclement weather playing havoc towards the end of the year in Tamil Nadu. Our Farm business, which forms a significant part of the overall business, was impacted by the strong headwinds in the agrarian sector.

It gives me pleasure to share with you that despite the impact on our top line from these challenges, your company has intensified its efforts in the passenger vehicle market along with multi-pronged action in the Farm and Commercial sectors to deliver a robust bottom line.

2015 has seen significant efforts being made to refresh our passenger vehicle replacement business with the introduction of several new and differentiated products and the strengthening of offerings in the SUV segment. Focus has also been on expanding our distribution footprint and rapid strides were made in expanding the branded store format. Digital continues to be an area of focus for the business with significant efforts in improving consumer experience and engagement. The year 2015 has seen the introduction of a refreshed website with some innovative consumer friendly tools and enablers.

In the farm business for 2015, your Company received awards from top tractor manufacturers such as M&M, TAFE, Escorts Agro Machinery and John Deere. These awards confirm the high trust and confidence our customers have reposed on us. The replacement business continued its focus on expansion and building channel health through a nurturing win-win relationship based approach with trade partners. A dealer relationship management program formed the basis for this approach. Product innovation continued with new introductions planned to capture additional opportunities.

Corporate Social Responsibility has been an area of immense focus in the year gone by. Your company has introduced two new programs as part of its sustainability drive with "Safer Roads, Safer You" and "Healthy India program". These programs are targeted at improving road safety and augmenting sanitation infrastructure respectively, two areas that are close to the heart of Goodyear.

2016 is likely to post a reversal in the fortunes of your company's farm business with expectations of a normal monsoon. Your company is well placed to capitalise on the opportunities in the rural economy. With the expected improvement in the economy, the Indian passenger tyre industry is expected to likely show a moderate growth in 2016.

In 2016, your company will also continue to focus on building/enhancing value for various stakeholders of Goodyear India. Expanding its distribution footprint, strengthening its presence in the branded retail segment alongwith improving overall brand strength and salience will remain key priorities for the business.

I would like to take this opportunity to thank our valued shareholders for their continued support and trust that they have shown in our company. We will continue to work with our stakeholders – our associates as well as channel partners and suppliers to deliver great products and continue to build value for all whose lives we touch through our day to day operations.

We will also continue to build on the values of innovation and sustainability in the years to come and continue to make a difference.

Yours Sincerely,

Rajeev Anand

7. FUTURE OUTLOOK

There is an increasing trend towards mechanization, which will boost the tractor demand in the future (Source: Crisil & ICRA). In addition, Indian tractor penetration still lags behind the global average (19 Vs 21 per 1000 hectares). These trends are supported with a high focus of the Government on agriculture as reflected in the current budget. Hence, while in the short term, the industry is facing strong headwinds due to failure of monsoon for two consecutive years, the long term outlook remains robust based on industry and macro trends.

The Financial Year 2016-17 outlook seems positive with above normal predictions of the monsoons by Indian Metrology Department ("IMD") leading to overall expected growth of 6% from the Farm Sector (Source: Niti Aayog projections & IMD predictions)

The passenger tyre industry is likely to register a modest growth in the year 2016. Driving distribution expansion, increasing the reach of branded retail and building brand salience through investments in the digital space will form the cornerstones for 2016.

Management Discussion & Analysis Report

In compliance of the provisions of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (“LODR Regulations 2015”), please find Management Discussion and Analysis Report forming part of Annual Report.

1. Industry Structure & Developments

The country has faced headwinds in the rural sector due to second consecutive year of below normal monsoon (12% below rainfall in 2014 and 14% below rainfall in 2015). This led to double-digit fall in tractor sales. With the Farm tyre industry structure skewed towards OE business, it has affected all players in this category. Your company being the significant player in this category also faced strong headwinds and worked on multiple initiatives to partially mitigate the same. These initiatives included scaling up of replacement and exports and tactically building commercial and grader business.

The consumer replacement business grew faster than the industry in 2015, thereby gaining valuable market share. This has been despite tough market conditions and increased competitive intensity in the overall tyre market.

2. Opportunities and Threats

In light of optimistic monsoon forecast by Indian Metrological Department (IMD) and Skymet we expect green shoots of recovery especially in the rural markets to start from second half of the year. However, it will take at least two good rounds of monsoon and harvest to get the consumer sentiments and rural economy back on track, due to sustained drought and indebtedness in the rural India.

Your Company will continue to focus on sustaining leadership in Farm OE business through excellence in key account management as reflected by numerous awards conferred to us from the OEMs. In Farm replacement business, we continue our growth by channel expansion and activations. Exports focus to key neighboring markets will continue. In commercial tyre business we will be working to build the business in future in line with huge opportunity offered in this category. These strategic actions are backed by a best in class and passionate team.

In passenger tyre business, there has been a gradual increase in consumer demand for more sophisticated vehicles especially SUVs. This shift in consumer demand will open up opportunities for the business to grow volumes as well as improve profitability. The economy is expected to grow at a robust pace, providing a favorable outlook for the future.

The competitive intensity has been high and continues to intensify with bolder measures and investments to garner higher share of business. The industry also faced headwinds in the form of low rainfalls second year in a row followed by Chennai floods taking some sheen of what was otherwise a good year. Your Company will continue to work to overcome challenges and capitalize on opportunities to grow overall business.

3. Segment-wise/ Product-wise Performance

The Company manufactures automotive bias tyres viz. farm tyres and commercial truck tyres at its Ballabgarh plant

and also trades in “Goodyear” branded tyres [including radial passenger tyres and Off The Road (OTR) bias tyres] manufactured by Goodyear South Asia Tyres Private Limited (GSATPL), Aurangabad. The other products in which the Company markets and sells include tubes, flaps and Radial OTR imported tyres.

The consumer business refreshed its product portfolio in the passenger segment with the introduction of new products like Assurance TripleMax and Assurance Duraplus. The business also strengthened its presence in the SUV segment with the launch of Wrangler AT/SA in new sizes. Whilst Assurance TripleMax is an offering which caters to the need of consumers who are looking for safety (braking ability being a key benefit), Assurance Duraplus strengthened our presence in the mileage seeking segment.

4. Outlook

We are expecting turnaround in rural economy and sentiments based on optimistic monsoon forecast. This should lead to a better performance from the Farm business aided by higher tractor sales by the Farm OEMs and renewed demand from replacement market. In addition, higher mechanization will further support growth in this category.

The passenger tyre industry is likely to register a modest growth in the year 2016. The consumer business will continue to focus on expanding its distribution footprint, strengthen its presence in the branded retail segment alongside investments towards improving overall brand strength and salience. The current favorable macroeconomic indicators combined with favorable monsoons forecasted this year could provide an impetus to the consumer sentiment thereby aiding overall growth.

5. Risks and Concerns

Change in the current rural economy and consumer sentiment will depend on the actual progress of the monsoons. There is still high indebtedness among rural population due to sustained drought. This is accentuated by low water levels across major reservoirs, which are prime source of irrigation for majority part of the country.

This year's budget has high focus on the Farm sector. The quality of implementation and percolation of benefits will determine the success of the same.

Imposition of fresh levies in the form of cess and taxes on certain class of vehicles or initiatives like the odd/even formula in Delhi have the ability to adversely impact consumer sentiments and thereby demand in the near future.

Approximately 26 % of the net sales of your Company were attributable to the sale of products procured from Goodyear South Asia Tyres Private Limited (GSATPL), Aurangabad.

The prevailing uncertainty in some of the legal disputes/ demands etc. raised against the Company, arbitrary disallowances in certain tax proceedings and untenable disputes raised are the additional areas of concern perceived by your Company.

As in the past, your Company has obtained insurance coverage for its assets. However, no coverage for the foreign exchange risk was obtained for its foreign exchange exposures.

Pursuant to section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014, till the standards of accounting or any addendum thereto are prescribed by Central Government in consultation and recommendation of the National Financial Reporting Authority, the existing Accounting Standards notified under the Companies Act, 1956 shall continue to apply. Consequently, these financial statements have been prepared to comply in all material aspects with the accounting standards notified under Section 211(3C) [Companies (Accounting Standards) Rules, 2006, as amended] and other relevant provisions of the Companies Act, 2013.

The Ministry of Corporate Affairs (MCA) has notified the Companies (Accounting Standards) Amendment Rules, 2016 vide its notification dated March 30, 2016. The said notification read with Rule 3(2) of the Companies (Accounting Standards) Rules, 2006 is applicable to accounting period commencing on or after the date of notification i.e. April 1, 2016.

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current – non current classification of assets and liabilities.

ii) Fixed Assets

Tangible assets are stated at cost of acquisition/construction net of accumulated depreciation and accumulated impairment losses, if any and assets taken

on finance lease on or after January 1, 2002 are stated at lower of the fair value/present value of the minimum lease payments at the inception of the lease. The figures of Land, Buildings and factory Plant and Machinery, which have been revalued during the year 1984, are on the basis of valuation report of an approved valuer.

Subsequent expenditures related to an item of fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Items of fixed assets that have been retired from active use and are held for disposal are stated at the lower of their net book value and net realisable value and are shown separately in the financial statements under the head 'Other current assets'. Any expected loss is recognised immediately in the Statement of Profit and Loss.

Losses arising from the retirement of, and gains or losses arising from disposal of fixed assets which are carried at cost are recognized in the Statement of Profit and Loss.

Intangible Assets are stated at acquisition cost, net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight-line basis over their estimated useful lives. A rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use is considered by the management. Gains or losses arising from the retirement or disposal of an intangible asset are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognized as income or expense in the Statement of Profit and Loss.

iii) Depreciation/Amortization

- As per technical evaluation, Plant and Machinery is treated as Continuous Process Plant as defined in Schedule II to the Companies Act, 2013 and the depreciation has been provided accordingly.
- Intangible Assets: Softwares are amortized over a period of 6 years based on the estimated economic useful life of the asset.
- The depreciation on the assets capitalized during the year is charged from beginning of the month following the date of capitalization.
- Depreciation is provided on a pro-rata basis on the straight-line method over the estimated useful lives of the assets as prescribed in the Schedule II of the Companies Act, 2013 except for certain fixed assets where, based on technical evaluation of the useful lives of the assets, depreciation is provided on the straight line method over the following useful lives:

Class of Asset	Useful life
Plant and Machinery	2-40 Years
Furniture and Fixture	3-10 Years

In respect of assets whose useful lives has been revised, the unamortised depreciable amount is charged over the revised remaining useful lives of the assets. Also refer note '11(c)' of notes to the financial statements.

iv) Inventories

Inventories are valued at lower of cost and net realizable value. Cost includes cost of purchase, conversion costs and appropriate production overheads incurred in bringing the inventories to their present location and condition and is net of all duties and input taxes which are available for set-off against output taxes. Finished goods are inclusive of excise duty. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

The basis of determining cost for various categories of inventories is as follows:

Raw materials	Weighted average
Stores and Spare parts	Weighted average
Work-in-process and Finished goods	Materials and appropriate share of labour and overheads

Inventories have been disclosed net of provision for obsolescence, if any. Provision for inventory obsolescence is determined based on management's estimate.

v) Research and Development Expenditure

The revenue expenditure on research and development is expensed under the respective heads in the period in which it is incurred.

vi) Revenue Recognition

Sale of goods: Sales are recognized when the significant risks and rewards of ownership in the goods are transferred to the buyer as per the terms of the contract and are recognized net of trade discounts, rebates, sales taxes and excise duties.

vii) Other Income

Interest: Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

Export Incentives: Income from duty draw back or other export incentives is recognized on an accrual basis.

Insurance Claims: Income from refund claim of insurance is recognized on realization of refund amount.

viii) Employee Benefits

Defined Contribution Plans

Employee State Insurance and Employee Pension Scheme 1995: Contribution towards these are made to the regulatory authorities. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made on a monthly basis.

Superannuation Fund: Contribution towards Superannuation Fund is administered by a trust set up by the Company, which is recognized by the Income Tax authorities. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made on a monthly basis.

Defined Benefit Plans

Provident Fund: Provident Fund contributions are made to a Trust administered by the Company. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of the year. Actuarial losses/gains are recognized in the Statement of Profit and Loss in the year in which they arise.

The contributions made to the trust are recognized as plan assets. The defined benefit obligation recognized in the balance sheet represents the present value of the defined benefit obligation as reduced by the fair value of plan assets and the same is disclosed as 'Interest on Provident Fund contributions'.

Gratuity: The Company provides for gratuity, a defined benefit plan (the "Gratuity Plan") covering eligible employees in accordance with the Payment of Gratuity Act, 1972. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each period. Actuarial losses/gains are recognized in the Statement of Profit and Loss in the period in which they arise.

Other Employee Benefits

Compensated Absences: Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the period end are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the period end.

Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the period end are treated as other long term employee benefits. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each period. Actuarial losses/ gains are recognized in the Statement of Profit and Loss in the period in which they arise.

ix) Income Tax

Tax expense for the period, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the period. Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the prevailing taxation laws.

Deferred tax is recognized for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognized and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. At each Balance Sheet date, the Company re-assesses unrecognized deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

x) Foreign Currency Translations

Initial Recognition: On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Subsequent Recognition: As at the reporting date, non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

All monetary assets and liabilities in foreign currency are restated at the end of accounting period. Exchange differences on restatement of monetary items are recognized in the Statement of Profit and Loss.

xi) Lease Rental

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the Statement of Profit and Loss on a straight-line basis over the period of the lease.

xii) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognized in Statement of Profit and Loss in the period in which they are incurred.

xiii) Impairment of Assets

Assessment is done at each Balance Sheet date as to whether there is any indication that an asset (tangible and intangible) may be impaired. For the purpose of assessing impairment, the smallest identifiable group of assets that

generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets, is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of the asset/cash generating unit is made. Assets whose carrying value exceeds their recoverable amount are written down to the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Assessment is also done at each Balance Sheet date as to whether there is any indication that an impairment loss recognized for an asset in prior accounting periods may no longer exist or may have decreased. An impairment loss is reversed to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had previously been recognised.

xiv) Provisions and Contingencies

Provisions: Provisions are recognized when there is a present obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Provision for replacement loss is determined on the basis of past experience and best estimates of management.

Contingent Liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

xv) Cash and Cash Equivalents

In the cash flow statement, cash and cash equivalents includes cash & cheques on hand, demand deposits with banks, other short term highly liquid investments with original maturities of three months or less.

xvi) Earnings Per Share

Basic earnings per share have been computed using the weighted average number of equity shares outstanding during the year. Diluted earnings per share have been computed using the weighted average number of equity and dilutive equity equivalent shares outstanding during the year-end, except where the results would be anti dilutive. In determining earnings per share, the Company considers the net profit after tax and includes the post tax effects of any extraordinary or exceptional items.

E. Haryana Local Area Development Tax (HLADT)		
In the year 2007, Hon'ble Punjab & Haryana High Court at Chandigarh, on a reference from the Hon'ble Supreme Court of India, had held the Haryana Local Area Development Tax (HLADT) as unconstitutional. Subsequently in the year 2008, the State of Haryana introduced "Haryana Tax on Entry of Goods Into Local Area Act, 2008 (Entry Tax)" by repealing the Haryana Local Area Development Tax Act, 2000 and the same was also held unconstitutional by the Hon'ble Punjab & Haryana High Court.		
Earlier based on the legal opinion obtained by the Company and management's assessment, provision towards liability for Haryana Local Area Development Tax (HLADT) for the periods prior to March 2008 aggregating to Rs. 540 lakhs was written back during the year 2008. The amount already paid for HLADT till December 2006 and expensed in earlier years is Rs.1,938 lakhs.		
Pursuant to an interim order of Hon'ble Supreme Court in October 2009, there is a stay on recovery of tax with a direction to assesseees for filing their returns of tax and giving undertaking that in the event of their losing the matter, they will deposit the tax along with the interest at a rate which will be determined by the Court. During the year 2010, on the matter being heard by a bench of five Hon'ble judges of the Hon'ble Supreme Court, it was requested to Hon'ble Chief Justice of India to refer the matter to a suitable larger bench for deciding the constitutional validity of the levy. The larger bench of Hon'ble Supreme Court is yet to be constituted. However, based on legal opinion obtained by the Company and management's assessment, no provision for HLADT and Entry tax has been considered necessary.		
** These represent the best possible estimates arrived at on the basis of available information. The uncertainties and possible reimbursements are dependent on the outcome of the different legal processes which have been invoked by the Company or the claimants as the case may be and therefore cannot be predicted accurately. The Company engages reputed professional advisors to protect its interests and has been advised that it has strong legal positions against such disputes. It is not practicable for the Company to estimate the timings of cash outflows, if any, in respect of the above pending resolution of the respective proceedings.
